2D 2D drawing – uses an open standard technology which is based on ANS, and supports the Internet Communication and Web Services (ICW) standard. 3D 3D drawing – uses the proprietary technology of AutoCAD Full Crack LT and Autodesk 3ds Max. AutoCAD 2009–2014 AutoCAD 2009 introduced a new line-breaking and polyline drawing interface, which retains the familiar user interface. It is a fully integrated feature within the drawing window, unlike a typical 3D application that requires a separate tool window. Drawing software is intended to complement the traditional desk and pencil method of creating drawings. AutoCAD 2009 introduced new drawing tools, which automate many of the manual tasks involved in the creation of a drawing. The software is known for its ability to accurately edit and create sophisticated geometric and topological shapes. It allows for the insertion of text, dimensions, notes, and other objects into the drawing. The software is capable of producing very detailed drawings. AutoCAD 2009 also introduced an enhanced version of the Arc Text tool. The Arc Text tool can be used to draw polyline, spline and polygonal features in three-dimensional space and is an essential tool for the drafting and design of architectural and civil engineering projects. AutoCAD 2009 also introduced the ability to store a drawing within a database. The database could then be used as an application for the development of work packages, or it could be downloaded from the Internet for further use. A new database functionality, SQL Server Integration Services (SSIS), was also introduced to allow users to import data from other applications such as Excel. This new tool is available in conjunction with AutoCAD 2009, and the software can be installed on top of SQL Server. AutoCAD 2009 introduced a new method of storing drawings in the cloud for use by various application. The cloud is accessible from anywhere. This new feature is integrated into the software and is designed to allow sharing drawings, as well as storing documents in the cloud for use with other applications. AutoCAD 2009 introduced a feature called "Thematic" which allows users to use any feature type as a tool of presentation. With this new functionality, users can create a custom theme to present their drawings in a consistent and attractive way. A drawing can be made a template to be used by multiple users. Users can create, store, edit, and send copies of the templates to their colleagues. The dynamic drawing also has the ability a1d647c40b
